WebDeveloper and IT Security Specialist

An information technology security specialist works with a team of IT professionals to develop strategies for protecting devices and systems within an organization from cyberattacks.

About Myself

My work habit depends on the work environment. i am able to adapt to and i can be more proactive with the job i applied to and the people around me.

I work on ensuring the stability and integrity of Networks, Systems, and Computers of the company i work in and provide protection against external attacks.

Job Goals

i hope to learn from many of my peers and co workers the inner working of this job and hopefully be able to put into practice their teachings and trainings.

Work Experience

i have no work experience as of now since newly graduating
